SUMMARY

3rd-year Computer Science student with a track record of building production-grade web applications, from multi-tenant SaaS platforms to booking systems with real payment and security requirements. Comfortable owning a project end to end: architecture, backend, frontend, and deployment.

EDUCATION

Bachelor of Science in Information Technology / Computer Science
3rd Year | In Progress

TECHNICAL SKILLS

Languages & Frameworks: HTML, CSS, JavaScript, TypeScript, PHP, Laravel, React, Next.js, Java, Python **Databases:** MySQL, MongoDB Atlas
Tools & Platforms: Node.js, NetBeans, Git, GitHub, Netlify, Railway
Concepts: Full Stack Development, REST APIs, OOP, Responsive Design, CRUD Operations, Role-Based Access Control

PROJECTS

KellyLodge: Student Hostel Booking Platform • *kellylodge-production.up.railway.app*

- Built a full booking system for student hostel listings with per-room-type inventory and instant booking backed by rowlevel locking to prevent double-bookings
- Implemented hoster and student dashboards, email notifications (Brevo), and secure file uploads with image validation
- Hardened security with bcrypt password hashing, CSRF/XSS prevention, and rate limiting. Deployed on Railway with MySQL

PromptForge: Prompt Engineering SaaS • *promptforgeus.com*

- Built a prompt engineering SaaS platform featuring an interview-style flow that guides users to generate high-quality AI prompts
- Developed with Next.js, TypeScript, and Prisma, including user authentication and a dashboard for saved/explored prompts
- Focused on mobile responsiveness and a clean, distraction-free interview UI

Citadel Attendance System • *citadel-production-5edc.up.railway.app*

- Developed a role-based attendance and access management system for an academic institution
- Supports four user roles: Students, Lecturers, Course Representatives, and Administrators
- Deployed on Railway with a robust back-end and secure session handling

MenuMuse: AI Marketing for Restaurants • *menumuse-v2-production.up.railway.app*

- Building a SaaS platform that uses AI (Claude API) to generate marketing content for restaurants
- Built with Node.js, MongoDB Atlas, and vanilla HTML/CSS/JS with a free and Pro tier model
- Features include AI content generation, mobile-responsive design, and a custom theme toggle

CERTIFICATIONS & STRENGTHS

- AWS Cloud Practitioner, in progress (ASAWASE CIC)
- Consistent self-driven learner, building real-world projects alongside academic coursework
- Strong problem-solving skills with hands-on experience across the full development stack
